Energy Efficiency

Small Businesses and Facilities Fact Sheet

You can save up to 75% of your energy efficiency project costs through incentives from ComEd. That's savings on top of savings.

Your Journey Starts Here

The ComEd Energy Efficiency Program was started to help businesses and public facilities save money and energy by helping them cover the cost of improving their facilities. We have been working with establishments just like yours to enhance working conditions, reduce energy-related expenses and better understand your energy use.

ComEd will work around your schedule to quickly identify upgrades that are easy to implement, so you can start your savings journey without missing a beat. Schedule a free assessment when it's convenient for you.

Benefits

Below are a few of the ways an energy efficiency project can improve your facility:

- **Dim spots in your workspace? Upgrading your lighting can improve working conditions.**
- **Areas too hot or cold? Improving your HVAC equipment can create the ideal atmosphere inside your business.**
- **Overactive air compressor? A leak assessment will help you keep your system in tip-top shape.**
- **Ineffective coolers? Optimizing your refrigeration units can curb excess energy use.**
- **Air escaping through windows or doors? Upgrading your ventilation and insulation is quick, easy and low-cost.**
